Respected Concerned Authority

I am Hemant Gupta, from 4th Year B.tech with your kind permission wants to draw your attention towards water issues at hostels (Malhar, Des and others).

I don't know what authorities are doing and what they are planning to do but in my view they are just keeping silent and seeing what the worst phase a student can go through and how badly affected one can be. We all know the quality of water is not good at college and water cans are provided on a daily basis in hostels but do you think if they are cleaning on a daily basis, as far as I know everyday I see a green algae in that bubble or dust particles in those cans. **I know you have share some reports stating that water can be drinkable, I suggest you to kindly drink this water for a week, ask other authorities as well to drink and let us know if this is fit to drink.**

I was at home with one week leave due to eye flew because of which I have to suffer with my studies(that's up to me and my family) but now also I am feeling sick due to this water issue because I have no other option other than to drink it (I am not that rich or wealthy student who buy water bottle on daily basis).

We self-found some solutions like drinking water and filling up bottles from the mess water filter but that also you failed to repair properly and now the mess water filter is also not working because of such a large number of students filling water from it.

The solution I can suggest is to either buy 2-3 water filter generators like one in the mess or contact some water filtration plant to provide such a number of filter cans on a temporary basis.

Urging you to kindly look towards us , we are also children of someone , they blindly trust you and you took responsibility of us. Instead of making fake promises, complete the promise you have made to our parents.

Various meeting are being conducted with director sir, GBM is there , BOS is there - why won't this issue be considered in these meeting, are you not worrying about us or just keeping your mouth shut and making some fake promises to resolve it. If you take responsibility for us than treat us like your children not someone others, and if not then stop calling this college as an great autonomous college(IIT) because IIT is a brand and I don't want anyone to make abuse of this word.

If you want you can ask for images or videos of water condition at hostels from our secretaries (if you listen to them) . They will let you know the worst condition we are going through. And please don't make excuse like we have done this or we will do this. Your strict concerned action is require this time.

Hope you think about our juniors future and waiting for your action on this issue in which 99.9% you failed to response.

Regards
Hemant Gupta
